

Remote Control Troubleshooting Tips

Power

Turn on/off a selected device.

STB - Set Top Box

The STB button must light up to control your set top box for Cobalt TV.

OK

Press the OK to show what program is currently playing.

Vol +/-

Raise or lower the volume.

Channel +/-

Change to the next higher or lower channel number.

On Demand

Local church services & content.

Closed Captioning (CC)

Input

Pressing the input button changes access to the devices you want to control. Typically, Cobalt TV is set to HDMI-1.

Input

Input Button

If the Input button at the bottom left of the remote gets pressed, it will change the input the TV is set to and you will not be able to see your Cobalt TV channels. Press the **Input** button repeatedly until you are able to get the correct input.

STB Button

The STB Button on the remote should light up when you press the buttons, except for volume and input. If nothing happens, press STB and then press the **OK** button.

OK Button

Navigate the menu and the guide with the arrow buttons, and then press **OK** to select the on-screen choices.

Closed Captioning

Press the # → key to turn on closed captioning. Press again for basic only and one more time to turn off.
